

STERIA recruits IT Graduates

You recently graduated as a Civil Engineer in Computer Sciences or you recently got your Master in Computer Sciences and you want to develop your talent in a project team in charge of major application developments in a Java/JEE environment.

You have or not a first job experience and you want to deepen your knowledge of the tools and techniques used in a professional IT environment.

Who is STERIA ?

STERIA belongs to the TOP 10 European IT Services companies. The service offer of Steria goes from consulting and design to implementation and operations of IT solutions. The Belgian subsidiary is very present in public services, but also in the banking and in the energy sectors. You can read more about Steria on our website www.steria.be.

Your profile

You have obtained by preference a graduate in Computer Sciences as a civil engineer or obtained a master between June 2007 and December 2009,

You are a computer geek,

You enjoy teamwork and social life,

You have an efficient communication, both in written and orally,

You have an excellent analytical mind and you can draw clear and synthetic conclusions,

You are solution-oriented and pragmatic,

You speak and write fluently in French and Dutch and you have an excellent knowledge of English.

Our offer

During the first weeks of your Steria contract, you will attend a training made up of theoretical training and practical work sessions to both develop your talent and be an active member of our project teams. We want you to grow your potential, by increasing your knowledge and developing your skills to become future leaders, experts or managers in our growing company.

To apply

Send your cv and your motivation letter to the attention of Roberto Alvarez (see below). Please indicate in your mail title "Candidate for the IT Starters training".

Start of the session

September 2010
