

.Net Developer (M/W)

STERIA is looking for *.Net Developers* (junior or senior) to reinforce its development teams for its customers in the Private Sector.

Your Mission

You will develop programs based on specifications established by Functional or Technical analysts.

You will carry out unit and integration tests.

You will report to the Project Manager.

You will be integrated into a team working in a functional area in total change with a technological challenge for the future (introduction of smart metering in the field of energy).

You will be integrated into a team trained daily with new Microsoft tools (.NET 4.0 , Visual Studio 2010, Team Foundation System)

Your Profile

You have a Computer Science diploma (or proven experience).

You have a good understanding of UML analysis and design.

You have a good knowledge of the Oriented Object programming.

You have a practical knowledge of .Net C# 3.0 programming.

Knowledge of the Net 3.5 framework would be an asset.

Microsoft certification is a plus

You are familiar with the tools : XML, HTML, Web Services.

You have a good knowledge of relational databases (SQL * Server 2005-SQL * Server 2008).

You are open-minded; problem solving oriented and have good communication skills.

You speak French (or Dutch) and English.
